

Craig Jimenez

Craig Jimenez is President, Director, and co-founder of EcoCentri, a clean-tech company holding exclusive rights to control technology for reduction of particulates, metals, SO_x, NO_x, and CO₂ emissions from coal and gas fired power plants. He also advises early stage companies in clean-tech and energy storage through Risk Oversight, LLC.

Prior to EcoCentri, Craig was President and Director of OGE Energy Resources, the \$1.3B energy and environmental products marketing subsidiary of OGE Energy Corp (NYSE: OGE). While at OGE he chaired Enogex's (now Enable NYSE: ENBL) Commodity Guidance Committee and served on the parent company's Corporate Risk Oversight Committee.

Early in his career, Craig produced commercial software and participated in Saudi Aramco's massively parallel reservoir simulator project POWERS. He's held various energy and financial P&L positions including structured products, storage trading, LNG trading, and he founded Mirant's weather-triggered options business-line for load serving entities. He prototyped and marketed FEA's market-leading model for arbitrage pricing and risk management of energy storage.

Craig's prior board service includes OGE Energy Resources, Inc., PWA, Inc., Angel Flight, Inc., National Energy Services Association (NESA), and the Oklahoma School of Science & Mathematics (OSSM) Foundation.

Craig served as a member of the nominating committee (comprised of non-board members) for the Professional Risk Managers International Association (PRMIA), and continues to serve PRMIA as a subject matter expert in two areas: 1- Energy, and 2- Risk Appetite and Executive Compensation.

Craig suffers from a sustained interest in energy/environmental markets and is a student of robust cryptographic implementations in finance, critical infrastructure, and cybersecurity.
